ABOUT ME

Fourth-year Electronics Engineering student specializing in Telecommunications at Politeknik Caltex Riau, with a full Tahfidz scholarship from the Riau Provincial Government. Experienced in fiber-optic network maintenance monitoring, telecommunications tools, and electronics projects. Interested in IoT, embedded systems, and programming, with strong communication and leadership experience.

EDUCATIONAL BACKGROUND

INSAN CENDEKIA BOARDING SCHOOL PAYAKUMBUH | 2020-2023

Science Major

Studied Science at SMA IT ICBS and joined the Tahfidz Al-Qur'an program, which built my discipline, perseverance, and independence.

POLITEKNIK CALTEX RIAU | 2023 - PRESENT

Electronics Engineering (Telecommunication Concentration)

GPA: 3.94/ 4.00 | Tahfidz Full Scholarship Awardee, Riau Provincial Government

PROFESSIONAL EXPERIENCE

RAMADHAN SPEAKER | Various Mosques and Islamic Youth Communities

2018 - PRESENT

Actively served as a Ramadhan speaker, improving public speaking, confidence, and social awareness.

PT. TELKOM INFRASTRUKTUR INDONESIA | Pekanbaru, Indonesia

Telecommunication Engineering Intern | 2026

Monitored ODP maintenance, network disturbance tickets, and FTTH infrastructure using PROMAN.

SKILLS

Technical Skills

- **Electronics instrumentation** (Oscilloscope, Multimeter, Function Generator, Spectrum Analyzer, Signal Generator, Network Analyzer)
- **Networking Tools** (Cisco, Cisco Packet Tracer, Atoll)
- **Programming Language and Algorithm (**MATLAB, Python, Flowgorithm)
- **Fiber Optic Simulation** (OptiSystem)
- **CST Studio Suite (**Antenna design)
- **Fiber Optic Installation (**Fusion & Mechanical Splicing, ODP, Connector Installation)
- **PCB Layout (**Easyeda, Eagle)
- **PLC Programming** (SoMachine, Fluidsm)
- **Electromagnetic Compatibility** (EMC)

Soft Skills

- Public Speaking
- Leadership
- Time Management
- Problem Solving
- Creativity
- Adaptability
- Empathy
- Professionalism

CERTIFICATION

- Introduction to Networks – Cisco Networking Academy | September 2025
- Switching, Routing, and Wireless Essentials – Cisco Networking Academy | January 2026

ORGANIZATIONAL EXPERIENCE

Student Legislative Body (BLM) – Politeknik Caltex Riau
Head of Commission II on Law and Legislation | 2025–2026
Member of Commission II on Law and Legislation | 2024–2025
(Drafted and reviewed student policies and coordinated legislative activities.)

Islamic Student Activity Unit (UKMI) – Politeknik Caltex Riau
Supervisor | 2026–2027
Majelis Syuro / Advisory Board | 2025–2026
Head of Muslimah Department | 2024–2025
(Supervised organizational activities, provided strategic guidance, and led Muslimah development programs)

Association of Electronics and Telecommunication Engineering (AET) – Politeknik Caltex Riau
Research and Technology Division | 2025–2026
Cadre Division | 2024–2025
(Contributed to technical projects, recruitment, and member development.)

ACHIEVEMENTS

- Gold Medal – National Youth Science Olympiad 2.0, Physics (2025)
- Gold Medal – Indonesian Science Championship, Physics (2024)
- Gold Medal –National Science and Statistics Olympiad in Physics (2024)
- Bronze Medal –National Science and Statistics Olympiad in Math (2024)
- Bronze Medal (Team) – GINECO International Competition (2024), IoT-based Air Temperature and Humidity Control System for Vehicles.
- Highest GPA – Electronics Telecommunication Engineering (2024), 23rd Cohort (3.97).
- Tahfidz Scholarship Recipient – Government of Riau Province.
- Finalist – Musabaqah Syarhil Qur'an (MSQ).
- 3rd Place – National Poetry Writing Competition (2025), RedGolden Competition Indonesia.
- Highest GPA – Electronics Telecommunication Engineering (2026), 23rd Cohort (3.94).
- 2nd Place – National Essay Competition Organized by HMJ Kimia UIN Alauddin Makassar (2026)

PROJECT EXPERIENCE

IoT-Based Automatic Clothesline System (ESP32, 2024)
Designed an IoT clothes-drying system using rain, temperature, and LDR sensors with real-time web monitoring.

Microstrip Antenna Design (CST Studio Suite, 2025)
Simulated a 2.4 GHz microstrip antenna and analyzed VSWR, return loss, and gain for RF applications.

Image Denoising GUI (MATLAB, 2024)
Developed an interactive GUI for image noise reduction using spatial filtering techniques.

Remote-Controlled Car via Smartphone (IoT & Bluetooth, 2024)
Built a mini car controlled through a smartphone app using Bluetooth wireless communication.

Line Follower Robot (2024)
Designed an autonomous robot using infrared sensors and microcontroller-based motion control.

Bus Ticket Reservation App (Python, 2024)
Created a GUI-based bus ticketing system with passenger data input and payment validation features.

Telecommunication Project – Bad Spot Analysis & New BTS Site Design (2025)
Conducted field measurements using G-NetTrack Lite and CellMapper to analyze weak signal areas and propose new BTS locations using AutoCAD mapping.

Community Service Project – MAN Insan Cendekia Siak (2025)
Mentored students in sensors, microcontrollers, and line-follower robotics through a lecturer-led program.

Bidirectional Pulse Code Modulation System (MATLAB)
Developed a bidirectional PCM communication simulation covering signal transmission and reception.

FTTH Network Simulation (OptiSystem)
Modeled an FTTH network from Telkom Pekanbaru to a residential area using OptiSystem.

Real-Time Friday Prayer Congregation Counting System (Webcam & YOLO, 2026, Ongoing)
Developing a webcam-based system using YOLO to detect and count Friday prayer congregants in real time.

WASMAN Attendance System (2026)
Developed a spreadsheet-based attendance management system using automated formulas and filters to process monthly records, classify attendance status, and generate squad-based reports.
